

an organism changes Chap 10 Sec 4

part of evolutionary belief

natural selection

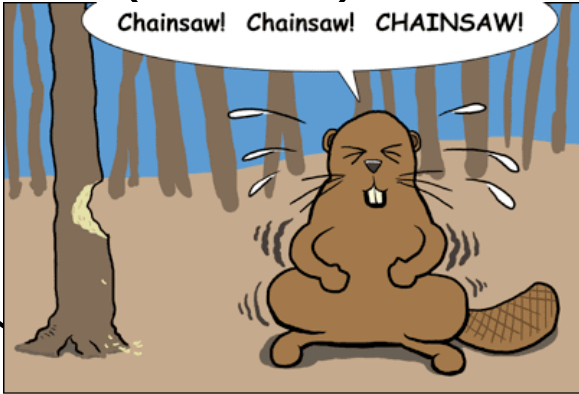

animals suited for an environment survive

Adaptation doesn't involve trying.

changes in activity Chap 10 Sec 4

adaptations or physical appearance

Adaptation doesn't involve trying.

Chap 10 Sec 4

how an organism fits into
it's habitat

niche

its food and it's
predators

Chap 10 Sec 4

the struggle to
survive

competition

Chap 10 Sec 4

the act of animals
killing another for
food

predation

Chap 10 Sec 4

an animal that kills
another for food

predator

Chap 10 Sec 4

the animal that the
predator kills and eats

prey

Chap 10 Sec 4

a close relationship

between
species

symbiosis

at least one
species
benefits

a relationship in which
both species benefit

Chap 10 Sec 4

mutualism

one species benefits and the
other is not helped or hurt

Chap 10 Sec 4

commensalism

one organism living on
or inside another

Chap 10 Sec 4

the other organism is
hurt

parasitism

the organism that live
on or in another

Chap 10 Sec 4

parasite

Chap 10 Sec 4

what a parasite lives
on or in

host
